

Summative Assessment

CONTENT:

- Summative assessment of how the students enjoyed the experience of the mushroom grow kits.
- As a class celebrate the success of completing the mushroom grow kits.

SUMMARY OF TASKS/ACTION:

1. As a whole class discussion, ask the children the summary survey questions (resource 1).
2. Document the student's answers.
3. Use the data from question 7 to compare against Lesson 1 to see if there is a change in data from "are mushrooms yummy" answered by the students.
4. Please use the opportunity to hand the children their certificates for successfully growing their mushrooms and cooking these at home! (Resource 2)

DID YOU KNOW:

With careful watching and attention your kit can produce a flush of mushrooms every 8-10 days and these flushes should last for 4-5 weeks (or longer!)

EXTENSION:

Continue to watch your mushroom grow kit develop and you can start to watch the process again as your second flush of mushrooms come in.
